

Our Organization

Sac River Services (SRS) is a group of highly skilled and experienced resources available for Duck Creek Policy Administration projects. Our organization has broad experience in all P&C lines of business, including personal, commercial and specialty. We are a family based business that includes two founding members of Duck Creek Technologies, along with two other individuals with extensive experience working with Duck Creek software and processes. SRS works exclusively with existing DCT customers and partners as a boutique contracting service. We have discovered that being small *and* experienced translates into an extremely agile project for our customers. If you need it done quickly and efficiently, but without sacrificing accuracy, our group may be a perfect fit for your organization. Think of us as your company's own personal product SWAT team or even "duck ninjas" if you will.

Our Services to You

- Duck Creek Product Checkup—This no-risk service includes a review of your current DCT policy products to ensure maximum efficiencies. We will help determine if you are getting the most out of your current products.
- Duck Creek Product Design and Development—SRS will assist you in delivering a new product to market with agility *and* accuracy. Our unique understanding and experience with both insurance products and DCT technology can significantly improve your speed to market.

- Duck Creek Product Maintenance—We know it's not over when the product is implemented. Our team can help you stay current with the changing needs of the insurance industry. In order to not only keep up but lead the pack in the marketplace you need to be able to quickly respond to new product demands. SRS can be a great solution in providing a quick response with new product features, upgrades and even redesign of your current product.

Our Service to Others

While Sac River Services is providing service to you, our organization is also committed to providing service to others. SRS was created to generate revenue to stimulate the local rural economy and to help support Sac River Institute, a 501(c)3 charitable organization that assists the rural population residing within the Sac River basin. Recent projects include:

- Substance Abuse Recovery Court Incentives and Community Service Projects
- College Entrance Exam Workshops
- Care to Learn Matching Funds for the local education system
- Afternoon School Nutritious Snack Program
- Computer Skills Class
- Health & Fitness Initiatives
