# You have questions.
We have answers!
Sac River Services Architect-On-Demand

?

1 *"Is there a better way to do..."*

No doubt, the Duck Creek application is rich in features. But the real value is in knowing which feature is best to use for which task.

Purchase a set number of hours per month that can be rolled over to the end of your service year. Much less than the cost of actually hiring just one highly skilled architect!

While our architects do not provide training on the Duck Creek platform, we can help train your team on your specific implementation and business user needs.

"How do I enable my staff to..." **2**

Your internal staff can be empowered by the Duck Creek Application. Provide them with additional learning opportunities that sharpen specific skills and increase the depth of their knowledge.

3 *"What's the best way to..."*

The Duck Creek application is highly flexible and configurable so there are many ways to accomplish tasks. But there are "best practices" that can save valuable time and money down the road.

With over 100 implementations under our belt. If it can be done, chances are we have done it before!
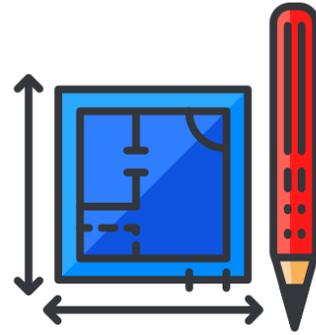

The art of saying **YES!**

"My business users want to do ....can I do that in Duck Creek?" **4**

The Duck Creek application was built to help you differentiate. This means your team can finally say "Yes!" to your business users.

5 *What can Architects-On-Demand design & build in 10 hours or less?*

Customer Endorsements, New Coverage Implementations, Rating Worksheets, Coverage Shopping, Customized Pages, 360 Degree Party Connections. And the list goes on...

How could I use 10 hours a month? **6**

Get on-demand design advice for complex changes, support for challenging system questions, assistance in building a solid product base, or even a re-design of your existing implementation. Whatever has been keeping you up at night!

7 *How do I find out more?*
